Dear Aeroflex customer,

Aeroflex Acquisition Completed

Earlier today, Cobham plc announced that it has completed the acquisition of Aeroflex, Inc. Cobham is a global technology company, serving multiple markets including aerospace and defense, with market-leading positions in audio, video and data communications, air-to-air refueling, aviation services, and defense equipment.

This acquisition brings together two strong technology companies with complementary characteristics. Aeroflex, with its leading position and deep capability in RF and microwave devices, components, modules and subsystems, will integrate into the Cobham Advanced Electronics Solutions Sector in the United States, which itself has complementary radio frequency capabilities.

Bringing Aeroflex into the Cobham family represents another investment in a business with market leading positions, and extends our horizons through the combination of Cobham and Aeroflex technology, innovation, and know-how.

Your business is important to us, so rest assured that we will take every measure to ensure this transition is as seamless as possible for you. You can rely on continuing to receive the high quality, timely delivery and excellent customer service you expect.

We appreciate your continued business and support and very much look forward to working with you. We will keep you informed as our efforts progress. However, if you have any questions or need further information, please feel free to contact me or your existing Aeroflex contact. For more information, please visit www.cobham.com.

Sincerely,

A handwritten signature in black ink, appearing to read "Jill Kale".
